DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims appear to be drawn to an invention not disclose in the specification. Specifically, there is no disclosure of a surgical apparatus for conveying fluid to a remote surgical site. Accordingly, there is no mention of a fluid nozzle, a hollow tube disposed within a lumen of the cannula, a support element attached to a nozzle, a fluid inlet, etc. Prior art rejections will be applied to the claims as best understood.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 recites the limitation "the optical element" and "the endoscope" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Chin et al (6,276,825).

Claims 1-3, 6, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacoby (5,230,621). Jacoby shows a surgical apparatus for conveying fluid to a remote surgical site comprising an elongated cannula 14b having a lumen 104 extending between the ends, a fluid nozzle in fluid communication with a distal end of a hollow tube 108 disposed within the lumen for translational movement therein (see col. 15, lines 41-col. 16, line 6). As to claim 2, note the support member 108 which extends within the cannula and facilitates extension and retraction of the nozzle.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 102 (page 10, line 4), 147 (page 18, line 11) and 340 (page 26, line 3). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 111 (Fig. 2) and 108 (Fig. 1). A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
